HARDY PERENNIAL FLOWERS

WEATHER PROOF PERENNIALS—Rocknoll is located 22 miles north of the Ohio River in Southwestern Ohio. We have severe cold winters often without a protecting snow blanket and hot dry summers. Temperatures range from 20 degrees below zero F. in winter to 100 degrees in the shade in summer. We have periods of heavy rainfall and periods of drought just the same as you do.

Our soil, while very fertile and productive, is only good farm land used for growing corn before we took it over. We do not have deep black celery soil or sandy old lake bottoms to force fast growth on plants that often fail to hold up when moved to your garden soils.

ROCKNOLL'S PLANTS WILL GROW FOR YOU

HUMIDIFIED PACKED ROSES

To assure a minimum of water loss, the roots of Rocknoll's roses are covered with a damp packing material and tightly rolled in moisture proof paper. The tops and the neck of the root covering packages are then sealed by dipping in a special non-burning wax. This process assures the plants being viable and sure to grow.

FLOWERING SHRUBS

Rocknoll's shrubs are all 2-year-old, well branched field grown plants and in no case should be compared with small pot-grown shrubs usually sent out on mail orders. Our well-rooted, well-branched shrubs should bloom this coming season. All are 2 to 4-ft. high before being cut back for shipping and transplanting. REMEMBER—To get these large shrubs you must order early—before April 15th because after that date our large plants usually have broken dormancy. Late orders will be filled with potted shrubs when available.

HEMEROCALLIS—DAY LILIES

EVERY YEAR Hemerocallis or Day Lilies are becoming deservedly more popular as they grow successfully anywhere in the United States. These plants bloom from May through August but their main show is in July, when there is not much else in bloom. Their warm colors blend in perfectly with the hot July sun. Grow well in sun or half-shade. We ship large flowering roots. Spring orders filled in early spring but if stock is temporarily exhausted we reserve the right to complete your order in July or August.

CHRISTINE BUISMAN ELM NEW DISEASE-RESISTANT HYBRIDS

This is the elm that was developed in Holland a number of years ago by Dr. Christine Buisman. Repeated tests over many years by the United States Department of Agriculture show that it is highly resistant to both phloem necrosis and Dutch elm disease.

Buisman Elm is a selection of the European Smoothleaf Elm. It has a straight trunk with slender, but strong ascending branches that form a pyramidal head, or sometimes spreading and forming a round-topped head. The handsome foliage is dense and dark green. Buisman elm is highly satisfactory both for lawn and street planting.
